

At Webster University, we will never lose sight of our founding mission in 1915—to focus on our students. We focus on attracting an inclusive student body, supporting these students in every way, ensuring they graduate and make their mark in their communities and in the world.

A new Webster University campus beautification plan is a unique way for you to support this mission, by ensuring a vibrant, welcoming, and sustainable setting for students. Introducing **Gorlok Gardens: Planting for the Future**. This is your opportunity to sponsor a garden on the main campus, in Webster Groves.

There are 24 unique spaces to choose from in eight prominent areas on campus. Each garden area is uniquely planned by gardening experts to include a mix of flowers, grasses, shrubs or trees that will enhance the beauty of our campus.

Sponsorships range from \$1,000 to \$25,000 and will include a recognition plaque with your name, company name, or the name of an individual, group or organization you want to honor or commemorate. On the back of this page are the area designations for each Gorlok Garden space.

We hope you will join us in sponsoring a beautiful Gorlok Gardens space, and plant the seeds that will bloom into a bright future for our students.

Let's talk more about the Gorlok Gardens sponsorship opportunity.
