NOTES :

- This plan assumes a student starting at Webster with no prior knowledge of Spanish. If you have taken Spanish in high school or have experience with the language outside of an academic setting, you should take the **placement test** to be placed at the most appropriate level and move more quickly into the advanced-level courses.
- **Transfer students** can also complete a Spanish degree but should either transfer Spanish language from a previous institution, choose an intensive study abroad option, or be prepared to spend extra time at Webster in order to complete all the requirements.
- This plan includes a **study abroad** semester in the spring of the third year. There are many options for international experiences and diverse formats available (summer, semester, year). Depending on your choice of program you may earn more than 6 credits and be able to move through the program more quickly or to add more easily a second major.
- \*\*If you only take 6 advanced-Spanish credits during a semester study abroad experience, you will need to request an independent study at some point during your advanced coursework. Please request this during registration period, so that you and the instructor can plan accordingly.
